Professional Skills

- Next.js | TypeScript | React.js | Javascript | HTML | CSS
- Firebase | Clerk | PayMongo | Resend Email
- Full-Stack Development

Job Experience

- **Field Service Engineer** at [RA Technologies Corp.](#) (November 2020 - July 2021)
 - Worked on maintaining Automatic Optical Inspection (AOI) Machines and their corresponding software application used by the Lear Corporation for their Automobile Harness Quality Inspection.
 - Optimized the AOI to reduce error and increase the accuracy of the results from the inspection.
 - Documented edge cases where the AOI has a huge probability of error and proposed countermeasures and solutions to the Lead Software Programmer.

Projects

- **Evolve booking (August 2024):** <https://www.evolvebooking.co>
 - Developed a Pilates appointment booking web app with admin management tools, secure payments via PayMongo, and styled emails using Resend. Optimized user flow with TypeScript and Tailwind CSS, improving engagement and reducing errors.
- **Parking Hub (June 2024):** <https://parking-hub.vercel.app>
 - Built a parking slot reservation system with admin controls, real-time chat, and push notifications using Firebase. Enhanced user experience with responsive design and streamlined parking operations.
- **CIT-U ETEEAP (August 2024):** <https://citu-eteep.vercel.app>
 - Created an application management platform for CIT-U's ETEEAP program, enabling submission tracking and efficient admin reviews. Used Clerk for secure authentication and Firebase for seamless data handling.
- **UniHydro Cebu (October 2024):** <https://www.unihydrocebu.com>
 - Designed a responsive static website for a hydropower company, showcasing their portfolio. Improved SEO and delivered a professional, mobile-friendly layout using Next.js and Tailwind CSS.

Education

- **BS in Computer Engineering** at [Cebu Institute of Technology - University](#) (August 2021 - Present)
